

CREATING IBM CLOUD SERVICE

Date	29 OCTOBER 2022
Team ID	PNT2022TMID16859
Project Name	GAS LEAKAGE MONITORING AND ALERTING SYSTEM FOR INDUSTRIES

The screenshot displays the IBM Cloud dashboard in a web browser. The browser's address bar shows the URL <https://cloud.ibm.com>. The dashboard header includes the IBM Cloud logo, a search bar, and navigation links for 'Catalog', 'Manage', and the user profile 'Nagarajan Selvaraj's Ac...'. A 'Create resource' button is prominently displayed in the top right corner of the dashboard area.

The main content area is titled 'Dashboard' and features a 'For you' section with five recommended actions, each with a 'Getting started' button and an estimated time:

- Build**: Explore IBM Cloud with this selection of easy starter tutorials and services. (5 min)
- Monitor your resources**: Get visibility into the performance and health of your resources. (5 min)
- Explore IBM Analytics Engine**: Develop and deploy analytics applications using open source Apache Spark and Apache Hadoop. (10 min)
- Create and deploy an application**: Browse our starter kits, and then select one to jump start the process to create and deploy your app. (5 min)
- Create a Kubernetes cluster**: Automate deployment: manage your container apps in a native Kubernetes experience. (5 min)

Below the 'For you' section, there are four tiles: 'User access' (with a 'Manage users' link), 'News' (highlighted in blue, with a 'View all' link and the text 'IBM Tech Now: October 24, 2022'), 'Planned maintenance' (with a 'View all' link), and a section for entering email addresses to jump directly into specific services.

The bottom of the image shows the Windows taskbar with various application icons and the system tray displaying the date and time as 09:51 PM on October 24, 2022, along with weather information (26°C Cloudy) and language settings (ENG).
